

INNOVATION IN THE HEALTH SECTOR

SKILLS FOR A NEXT GENERATION U.PORTO

20th OCTOBER 2023

16:00 – 18:00 (WEST)

FMUP – MEDCIDS – Department of Community Medicine, Information and Health Decision Sciences

Health services in the future must solve medical needs, including the correct use of artificial intelligence, the development of medical devices, the discovery of new drugs, and the development of technology to monitor organ activity. These may lead to the creation of start-ups, which may evolve into large medical companies in close collaboration with medical schools.

**SKILLS
FOR A NEXT
GENERATION**

UNIVERSIDADE
DO PORTO

The round table “Innovation in the Health Sector” will approach these topics, while also aiming to stimulate entrepreneurship career opportunities for undergraduate and newly graduated medical students.
