Language of teaching	Englisch, German
Brief description of the teaching activities the visiting lecturer /professor is expected to perform (including assessment, if applicable):	<p>European criminal law instruments must comply with the requirements of the EU legal order on the one hand and the legal order of the Member States on the other. However, integration is not achieved in the same way in the legal systems and criminal law of the Member States. It is useful to get to know the legal solutions of other countries and the problems that may arise from them, and the possibility of comparison will enable us to gain a deeper understanding of our national legal systems. We address the start of the European Public Prosecutor's Office.</p> <p>General concept of the course: to give the law students a brief introduction to the Hungarian criminal law system; 2. to broaden their knowledge of the European implications of the Hungarian criminal law system; 3. to provide other MS law students with a more precise picture of the theoretical background and practical functioning of their legal institutions by comparing them with comparable domestic legal institutions.</p>

Brief description of the teaching activities the visiting lecturer /professor is expected to perform (including assessment, if applicable):	<p><b>The role of the visiting professor in the subject of algebra may encompass a variety of responsibilities related to teaching, research, and scholarly collaboration. The following is a brief description of typical teaching activities that a visiting professor in this discipline would be expected to perform:</b></p> <p><b>Lecturing:</b> The visiting professor might offer lectures and practical work sessions related to algebra topics covered in the curriculum. This involves preparation of teaching materials, clear presentation of concepts, and facilitation of discussions to promote student understanding.</p> <p><b>Assessment:</b> You could design and administer assessments to measure student progress. This may include written tests, projects, homework, and other forms of assessment to measure the level of understanding and application of algebraic concepts.</p> <p><b>Tutoring and Advising:</b> Provide additional support to students through tutoring and advising. Be available to answer questions, provide guidance on specific problems, and offer assistance in the development of algebra</p>

skills.

**Research and Academic Development:** Encourage research in algebra through participation in research projects, publication of scholarly articles and collaboration with other professionals in the field.

**Research and Academic Development:** Encourage research in algebra through participation in research projects, publication of scholarly articles and collaboration with other professionals in the field. Share findings and updated knowledge with the academic community.

**Participation in Academic Activities:** Contribute to seminars, conferences and other academic activities that promote the exchange of knowledge. Participate in departmental committees and meetings to contribute to the development and continuous improvement of the subject.

**Development of Didactic Materials:** Create or adapt innovative didactic materials that facilitate the teaching and learning process. This may include the incorporation of educational technologies and effective pedagogical methods.

**Collaboration with Other Faculty:** Work collaboratively with other faculty in the department to coordinate course content, align objectives, and ensure a coherent educational experience.

**Student Mentoring:** Provide academic and career guidance to students interested in algebra. This may include advising on career options, graduate programs, and research opportunities.

In summary, the expectation is to combine effective teaching skills with active

	<b>participation in research and scholarly collaboration, thus contributing to the comprehensive development of the subject and the academic growth of students.</b>
